

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. #### FEEES.

In recent years the corporation has become a favorite form of investment of private capital, but the widespread financial depression that has prevailed throughout the country during the past year has tended to discourage the projection of business ventures of any magnitude, and as a consequence the revenues of this department have been materially affected.

The receipts of the department from fees and other sources aggregate \$92,921.99, as compared with \$170,301\* in 1893, being a decrease of \$77,379.01.

During the year there has been charged and collected from foreign corporations for the privilege of doing business or exercising their franchise in the state, the sum of \$24,980.04. Of this amount \$6,430 was paid by two hundred and fifty-one corporations under the act of April 25, 1893, and \$18,550.04 by one hundred and nineteen corporations under the act of May 16, 1894. Deducting these two amounts from the total collections for the year, it will be seen that the fees collected from domestic corporations alone are but \$67,941.95, or a decrease, as compared with 1893, of \$95,654.05.

The quarterly receipts were as follows:

First quarter.....	\$22,693 50
Second quarter.....	24,978 60
Third quarter.....	23,915 69
Fourth quarter.....	21,134 20

At the time of making my annual report for the year ending November 15, 1893, there still remained in my hands the sum of \$33 000 00, being \$30,000.00 fees paid by the Baltimore and Ohio Southwestern Railroad Company, and \$3,000.00 paid by the Pittsburgh, Shenango and Lake Erie Railroad Company, which amounts had been enjoined from being paid into the state treasury pending litigation to determine the constitutionality of the law under which collected. These suits having been finally determined, the amounts were paid into the state treasury.

## SUPREME COURT REPORTS.

During the year the following volumes of the supreme court reports were issued :

To the United States Court, Cleveland, Ohio, vols. 46 to 49, inclusive, Ohio State Reports; to the supreme court of Ohio, 25 copies of vol. 50, Ohio State Reports; to states and territories, 47 copies of vol. 50, Ohio State Reports; to clerks of courts of various counties, 88 copies of vol. 50, Ohio State Reports.

One hundred and sixty bound copies of vol. 50, Ohio State Reports, were received during the year from the publishers, under their contract with the state, all of which were distributed as stated in the preceding paragraph.

The following statement shows the number of Ohio and Ohio State Reports on hand November 15, 1894 :

\*From 1803 to 1850 the Secretary of State was elected by the General Assembly.

†The Democratic party of to-day claims lineal descent from the first Republican party with President Jefferson as its founder. Authorities differ as to the date when the party dropped the name Republican and assumed that of Democrat, it being ascribed to various dates between 1805 and 1820.

‡Political parties were disorganized at the time of the election of John Q. Adams. He claimed to be a Republican as Jefferson, but his doctrines were decidedly federalistic. The opposition to his administration took the name of Democrat and elected Jackson President in 1828.

## STATISTICS OF MANUFACTURES.

---

The following statistics of manufactures, compiled in 1890 by experts in charge of the Division of Manufactures of the census office, show the number of establishments, capital invested, the number of employes, average wages, cost of material and value of product of 63 of the leading industries in the State. Ohio is fifth of the manufacturing states in the amount of capital invested, number of operatives engaged, and value of output. The value of agricultural implements produced in the United States during the year 1890 was \$81,271,651, and Ohio stands second in the list, its output being worth \$14,333,258. Of carriages and wagons, valued at \$114,551,907, Ohio produces \$18,777,866 worth, being the largest amount produced in any state. The factory product of men's clothing is valued at \$20,604,134, only four states surpassing Ohio in value of the product. In the production of women's clothing, in factories, Ohio is third, with values at \$4,352,098. In the grinding and roasting of coffee and spices, Ohio is second, the value of the product being \$7,806,763. In cooperage Ohio is third, the product being \$3,405,159. Of flouring and grist mill products Ohio makes \$39,468,409 worth, being fourth in the list of producers. The foundries and machine shops of the State produce articles valued at \$43,617,072, New York and Pennsylvania only surpassing it. New York, Illinois and Michigan are the only states which produce more furniture from factories than Ohio, where the value of this product is \$8,780,689. In the production of glass Ohio is second, as also in the manufacture of iron and steel, the value of the output being \$57,134,110. It holds the same position as to nails of all classes, and is fifth in architectural iron work. Only five states tan and curry more leather. It stands third in the value of distilled liquors and third in the value of malt liquors. Of lumber and other mill products from logs or bolts, Ohio makes \$15,161,730 worth, and of planing mill products, including sash, doors and blinds, \$12,910,528 worth. In the production of paints we are fourth in value, as also in the value of paper produced. Of petroleum we are fourth in list. The products of its printing offices amount to the sum of \$17,015,401, two other states only surpassing it. It stands first in the production of saddlery and harness; in shipbuilding it is third. It slaughters and

packs meat for wholesale to the value of \$17,012,198, and makes soap and candles valued at \$5,746,660. In tinsmithing, coppersmithing and sash iron working the products are valued at \$3,880,752.

These are some of the principal mechanical and manufacturing industries of Ohio, as they appear in the table, the total value of which amounts to the sum of \$523,058,986. And in all these industries there were employed 263,003 persons, to whom was paid annually in wages \$126,538,290, an average of \$481 to each, the average in each of the several branches being as follows: Iron and steel, \$593; glass workers, \$471; makers of men's and women's clothing, factory work, mostly women, \$289; planing mills and sash manufactures, \$542; workers in paint manufacturing, \$675. There is no department of statistics in which it is more difficult to obtain reliable information than that relating to manufactures; the accompanying table, therefore, is published for the benefit of such of our citizens as may be interested in the industrial development of the State.
